

For Macintosh® Users with MAC® OS 10.2 – 10.3.6

Uploading Images via iPhoto™

1. You must have iPhoto installed and ready before uploading images to your MAC®.
2. Connect the USB cable to your SS702.
3. Connect the other end to your Mac®. iPhoto automatically launches and presents you with a dialog box.
4. Click the Import button and iPhoto will automatically start reading the images on the camera and create thumbnail images, track when the images were taken (so you can easily find them by date) and saving the images to a master archive.
5. To learn more about iPhoto, please visit: <http://www.apple.com/ilife/iphoto/>

Note: Videos will be imported as multiple images via using iPhoto.
